Idaho Community Foundation
210 W. State Street
Boise, ID 83702-6052

Congratulations! The Community Foundations National Standards Board (CFNSB) applauds Idaho Community Foundation's confirmation of compliance with National Standards for U.S. Community Foundations. Your community foundation's confirmation is effective for five years beginning on the date of this letter.

As a public symbol of compliance, we invite your foundation to use the National Standards Seal and Communications Toolkit.

The **National Seal** is a graphic element that you may apply to communication materials to signify that your organization is in compliance with the rigorous National Standards developed for U.S. community foundations. Professional advisors and prospective donors will appreciate the designation as an indication of your integrity and demonstrated excellence. Please print the National Seal Guidelines from CFMarketplace.org to help you apply the Seal in appropriate, consistent ways.

The **National Standards Communications Toolkit** is designed to help you share the achievement of National Standards with donors, professional advisors and grantees. It includes communication strategies, letters, ads, web content, news releases and other tools—all developed to highlight your compliance with the most rigorous standards in philanthropy.

A **Licensing Agreement** is enclosed. Once you have signed and returned this document to the Community Foundations National Standards Board, you will have access to the National Seal and the Promotional Toolkit located on CFMarketplace.org.

Again, on behalf of the Community Foundations National Standards Board, we extend our congratulations to your community foundation for being found in compliance with National Standards for U.S. Community Foundations. We recognize and appreciate your foundation's efforts in this noteworthy achievement.

Sincerely,

A handwritten signature in black ink, appearing to read "R D Orduña".

Ruben D. Orduña
